The WebCorr Advantage in Corrosion Training: 8 Reasons Why You Should Consider WebCorr

NACE Certified Instructor | Learning Support | Certification Assistance | Value-for-Money | Widest Course Selection | Worldwide Location | Guaranteed Schedule | Choice of Delivery Mode

1. Train with the Expert, Train with WebCorr

WebCorr Corrosion Consulting Services is in the corrosion consultancy business and corrosion training is an integral part of our expertise and strength. Real-life corrosion case studies from our corrosion consulting work bring our corrosion course contents to life. All our courses are structured with a focus on knowledge and skills transfer. You gain both solid knowledge and real-life practical experiences at WebCorr corrosion courses. WebCorr is registered with the the Professional Engineers Board Singapore as a corrosion training provider. Our corrosion courses are developed and taught by internationally recognized and NACE certified Corrosion Specialist with 37 years of practical experience in the field. Corrosion Specialist is the highest level of professional certification in the corrosion industry by the world's largest corrosion society - **N**ational **A**ssociation of **C**orrosion **E**ngineers (NACE, USA). All NACE certification holders at various levels can be verified at NACE's official website.

Click here to check if your course instructor is certified by NACE.

2. Learning Support after the Training

Training is an event that takes only a few days but learning is a process that can take months or even years. At WebCorr, we understand that in-depth learning starts after the training. That is why we offer 6 months of learning support after the training to all participants in our courses. Each participant will receive a user ID and a password for accessing the online version of the same course to continue the learning process at their own comfortable pace and schedule. Learners can pause, re-play, fast-forward or backward the powerpoint slides which is not possible in a classroom setting. Questions and discussions related to the course can be emailed directly to our course instructor for prompt response. At WebCorr, we measure our training success by your learning outcome.

Click here to contact WebCorr Corrosion Consulting Services if you need more information on learning support for WebCorr corrosion courses.

3. NACE Certification Assistance

Each of our course instructors is NACE certified to the Corrosion Specialist level (highest level of certification in corrosion) and fully understands NACE's certification requirements at various certification levels. We will assist all participants in preparing for their NACE certification exams at appropriate levels after completion of the training courses. This includes advice on

NACE certification requirements, guidance on preparing and submitting application documents, writing a reference letter for your application, and assistance with finding a proctor for certification exams in your geographical areas.

Click here to contact WebCorr Corrosion Consulting Services if you need more information on NACE certification examination requirements.

4. Best Value for Money You get the best value for money at WebCorr corrosion courses. Your questions on real-life corrosion issues at hand (frequently of consulting in nature) are answered by our NACE certified Corrosion Specialist course instructor with 35 years of experience in corrosion consulting services. This savings in consulting fees can be worth multiple times of the course registration fee. Unlike seminars or online webinars where attendees passively watch or listen to the segmented presentations by different speakers, our corrosion courses systematically focus on **active learning** and **knowledge transfer** where attendees actively participate in the learning process by doing interactive virtual lab experiments to understand the subject matters and by applying the knowledge learned in the courses for critical thinking and problem-solving. We do not compete on course fees but on unparalleled course quality, learning support, and value-for money. Our training success is measured by your learning outcome.

Click here to contact WebCorr Corrosion Consulting Services if you need more information on how WebCorr corrosion training courses can benefit your business.

5. Widest Course Selection WebCorr Corrosion Consulting Services has developed 55 corrosion courses over the last 37 years covering all different types of corrosion in all industries, from galvanic corrosion in microelectronics and semiconductor industry to microbiologically influenced corrosion (MIC) in offshore and aerospace industries. Each and every one of WebCorr's corrosion training courses was developed at the request of our clients worldwide. Our clients' inputs and specific requirements help make our corrosion courses always relevant, practical, and directly applicable to the various systems, processes and industries. If you cannot find a course of your interest from our corrosion course list here, please let us know and we will happy to work with you to either customize an existing or develop a new training course to meet your specific training needs.

6. Worldwide Locations WebCorr Corrosion Consulting Services conducts in-house training corrosion courses and on-site training corrosion courses at worldwide locations selected by our clients. On-demand corrosion training courses can also be conducted in a city/country selected by our clients. Publicly

scheduled courses are offered in major cities in North America, Europe, and the Asia-Pacific.

7. Guaranteed Schedule
Publicly scheduled courses are typically subject to cancellation due to the minimum number of registrants required. This potential cancellation may cause huge problems for those who are interested in the course and have made plans for attending it. WebCorr Corrosion Consulting Services is the first company that offers course on-demand (one-on-one training or in a small group) with a guaranteed schedule specifically for those who require certainty. The schedules for in-house training and on-site training are guaranteed by default.

8. Choice of Course Delivery Modes
All our corrosion courses are available for any mode of delivery (the course contents are identical):

(1) In-House Training: This is classroom-based training conducted at your facility worldwide.

(2) On-Site Training: This is classroom-based training conducted on-site at your facility worldwide.

(3) Online Training: You can start an online corrosion course _at any time_ and learn _at your own comfortable pace and schedule_, whenever and wherever you are. You have around-the-clock access to the interactive and media-rich course materials, virtual labs, course instructions and course assessments. Learning support is provided directly by our NACE certified course instructor via Email, Whatsapp, Skype, Webex, or ZOOM. Unlike online webinars where attendees passively watch or listen to the presentation, WebCorr's corrosion courses systematically focus on active learning and knowledge transfer where attendees actively participate in the learning process by doing interactive virtual lab experiments to understand the subject matters and by applying the knowledge learned in the courses for critical thinking and problem-solving.

(4) LMS Integration: All our corrosion courses can be seamlessly integrated into your company's Learning Management System (LMS) for continuous education and training of your employees.

(5) On Webex or On-ZOOM: Webex is hosted by Cisco, a product purpose-built for real-time web communications. If you are an existing user of Webex, or if you are an existin user of ZOOM, we can conduct the course for you over Webex or ZOOM, with audio and video presentations and interactions with the course instructor and other course attendees in real-time. It is similar to a physical classroom setting in which everyone can interact with each other. Your questions will be answered in real time by our instructor.

(6) On-Demand: WebCorr will conduct the course just for you on an one-on-one basis or for a small group from your company at a time and location convenient for you.

(7) Distance Learning: For those who do not have ready access to the internet, we can send you our eCourse materials on a CD-ROM, or DVD, or USB flash drive for offline distance learning.

The corrosion course contents and presentation format are identical among all modes of course delivery.
